

GUL-E-RANA

Full Stack Engineer | AI / Machine Learning Engineer

Rawalpindi, Pakistan | gulerana3205@gmail.com

linkedin.com/in/gul-e-rana-02734331a | github.com/Gul-e-Rana1 | Portfolio: gul-e-rana.vercel.app

PROFESSIONAL SUMMARY

Full Stack Engineer with 1.5+ years of experience building production web applications and AI-powered systems using React.js, Next.js, Node.js, Django, Flask, and Laravel. Delivered a deepfake image detection system (ImageGuard) combining a self-trained model with a full-stack React/Flask/MySQL architecture, and shipped multi-tenant SaaS, invoice management, and e-commerce platforms for freelance clients. Currently building self-directed projects in AI automation, Retrieval-Augmented Generation (RAG), and LLM-powered agents to bridge full-stack engineering with applied AI. Seeking a remote or on-site role as an AI Engineer, Machine Learning Engineer, Data Analyst, or Full Stack Engineer where strong end-to-end delivery and applied ML skills drive measurable product impact.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Ant Design, HTML5, Framer Motion

Backend: Node.js, NestJS, Django, Flask, Laravel, RESTful API Design, Authentication & Authorization

Databases: MongoDB, MySQL, PostgreSQL, SQLite

AI / Machine Learning: Machine Learning, Deep Learning, Computer Vision, CNNs, Object Detection, Deepfake Detection, NLP, RAG (Retrieval-Augmented Generation), LLM Integration, AI Agents, Workflow Automation, Image Processing, Data Analysis

Tools & Platforms: Git/GitHub, Postman, Docker (familiar), Vercel, Shopify (Liquid), Filament, Livewire, Power BI, VS Code

Practices: Agile/Scrum, Role-Based Access Control, CI/CD basics, Monorepo Architecture, Responsive & Cross-Browser Design

SOFT SKILLS

Problem-Solving, Cross-Functional Collaboration, Communication, Adaptability, Time Management, Attention to Detail, Analytical Thinking, Ownership & Accountability, Agile Teamwork

PROFESSIONAL EXPERIENCE

Full Stack Developer | uExel Solutions Pvt. Ltd. - Islamabad, Pakistan | Apprenticeship

Nov 2025 – May 2026

- Engineered and shipped scalable full-stack web applications using React.js, Next.js, PHP, Laravel, NestJS, and TypeScript, improving application performance through code splitting and query optimization.
- Designed and normalized relational and NoSQL databases across MongoDB, MySQL, and SQLite to improve data organization and query efficiency.
- Built responsive, cross-browser-compatible user interfaces that enhanced user experience and reduced UI-related issues.
- Collaborated with a cross-functional development team in an Agile environment, contributing to sprint planning, code reviews, and successful feature delivery.

Key Development Projects | Apprenticeship

2024 – Present

- Rivtec LLC (Live: rivtecllc.com)** – Built and maintained full-stack features using Next.js 15, Payload CMS, TypeScript, and MongoDB within a monorepo architecture, delivering reliable and scalable solutions.
- Standup Slackbot (Live: app.meta360.dev)** – Developed the React.js frontend and integrated backend APIs to display real-time employee activity, standup submissions, and GitHub commit tracking, improving team visibility and workflow management.
- Multi-Tenant Invoice Management System** – Developed a Laravel 12, MySQL, Filament, and Livewire platform with automated invoice generation, PDF export, email notifications, and reporting to simplify invoicing workflows.
- Agricultural Management Platform** – Built farmer management, field survey, and geographic data visualization modules using Laravel 12, MySQL, Blade, and Tailwind CSS, supporting role-based workflows for field operations.
- Shopify Store Customization** – Customized Shopify Liquid themes and storefronts by developing responsive layouts and reusable sections tailored to client requirements.

KEY PROJECTS

ImageGuard - Deepfake Image Detection System (Final Year Project) | React.js, Flask, MySQL, Python, CNN

- Situation/Task: Developed a web-based solution to help users identify AI-generated deepfake images and improve awareness of digital media authenticity.
- Action: Trained a custom Convolutional Neural Network (CNN) for image classification and integrated it into a full-stack web application with a React.js frontend, Flask API, MySQL database, and role-based dashboards.
- Result: Successfully delivered an end-to-end deepfake detection system combining machine learning, backend development, database management, and frontend development as a final-year capstone project.

AI Automation & RAG Systems (Self-Directed, In Progress) | Python, LangChain/LLM APIs, Vector Databases

- Building Retrieval-Augmented Generation (RAG) pipelines and LLM-powered AI agents to automate document search, business workflows, and intelligent decision support.
- Exploring agentic workflow automation, prompt engineering, and vector database integration to develop practical AI solutions.

Additional Projects | Portfolio Site · Hospital Management System · Digit Recognition

- Personal Portfolio Website (React.js, Framer Motion, Tailwind CSS) — responsive site with animated transitions showcasing projects and case studies.
- Hospital Management System (Full Stack, Role-Based Dashboards) — streamlined patient and appointment record management for admins, doctors, and staff.
- Handwritten Digit Recognition System (Python, Deep Learning, CNN) — trained a computer vision model with high classification accuracy on handwritten digits.

EDUCATION

BS Computer Science

Sep 2021 – Aug 2025

Quaid-i-Azam University, Islamabad — CGPA: 3.7/4.0

Intermediate in Computer Science (ICS)

2019 – 2021

Islamabad Model College for Girls (P.G.), F-7/4, Islamabad — Grade: A

CERTIFICATIONS

- AI, Data Science & Blockchain — NAVTTC & COMSATS University Islamabad
- Microsoft Power BI — Udemy
- ACT AI (Currently Enrolled) — HEC, Prime Minister's Youth Programme, NAVTTC
- UI/UX & Webflow (DigiSkills 3.0) — Virtual University of Pakistan
- Graphic Design (DigiSkills 3.0) — Virtual University of Pakistan

ACHIEVEMENTS

- Selected for the competitive PSEB Apprenticeship Program at uExel Solutions Pvt. Ltd.
- Maintained a 3.7/4.0 CGPA while completing parallel certifications in AI, Data Science, and Power BI.

LANGUAGES

- Urdu - Fluent
- English - Intermediate
